Regional Water Quality Control Board
Central Coast Region #3
81 Higuera Street, Suite 200
San Luis Obispo, CA 93401-5427

Associate Water Resources Control Engineer

The Central Coast Regional Water Quality Control Board is seeking a qualified applicant to fill a Storm Water position. The employee will be responsible for management of the Storm Water Program and will perform Storm Water duties in the Watershed Branch.

Duties: Under the general supervision of a Senior Engineering Geologist the candidate is expected to be the lead person for the following activities:

- Program manager for the Regionwide Storm Water Program
- Interfacing and coordinating with the SWRCB's Storm Water Program, and responsible for coordinating this Region's Storm Water workplan commitments
- Implement the Storm Water program by conducting inspections and preparing and issuing various storm water regulatory permits.
- Develop and implement this Region's Phase II Storm Water Program and permits.
- Develop public outreach program for the Storm Water Program.

Minimum Qualifications: Applicants currently must be reachable on the Associate Water Resources Control Engineer, hiring list. Other eligible candidates on appropriate lists for Engineering Geologist, Water Resources Control Engineer, Environmental Specialist, Sanitary Engineering Associate, and Land Use Analyst classifications may also be considered for this position.

Desirable Qualifications: Previous experience in a leadership and program management position. Ability to interface at community and public outreach functions to promote and communicate the Storm Water Program. Excellent verbal and written communication skills are also necessary for this position.

This is a permanent, full-time position. Final filing date: June 16th. Submit Standard State application and resume to Tresa Guaspari at the above address. For more information regarding this position please contact Gerhard Hubner at (805) 542-4647 or Brad Hagemann at (805) 549-3697.
